

# The architecture of holes.

The science of architecture fused with the art of perforation.

## ABOUT US

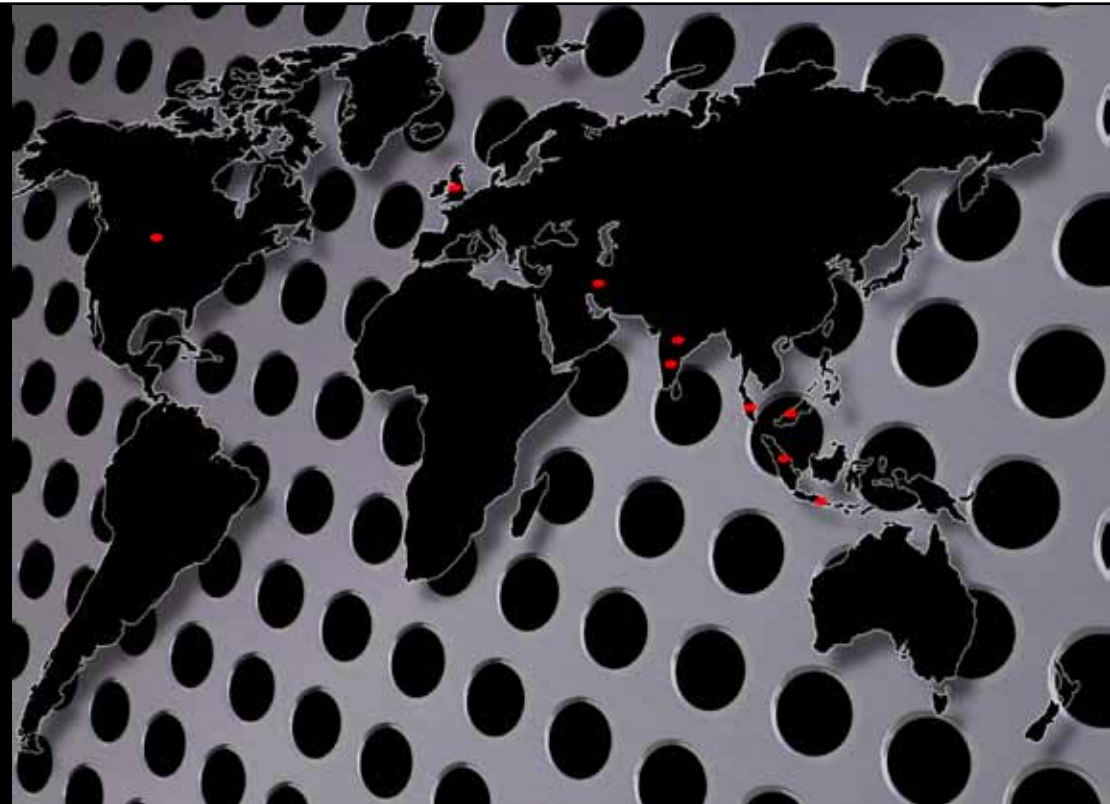

**Diamond Metal Screens Pvt.Ltd, Belgaum** is one of Asia's largest perforators. We provide perforation solutions for your designs. Be it from Architecture, IT or Food processing, perforated sheets have their own distinct uses. The company is located in Belgaum, (Karnataka).

### Our USP

- Perforation done on Stainless Steel, Aluminium, CRCA and Galvanised Steel.
- Hundreds of Perforation patterns available
- Value added services like fabrication and forming of sheets
- Customised design solutions for use of perforated products by architects and builders

OUR CUSTOMERS

# PERFORATED FACADES IN ARCHITECTURE

Perforated facades provide advantages such as ventilation, reusability and giving the building a modern touch.

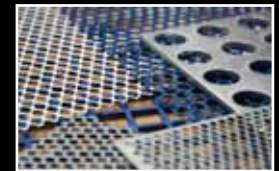

Sheet metal facades are durable, easy to assemble and replaceable easily. These advantages make the facade system a favourite among architects.

## CHOOSE FROM A VARIETY OF PERFORATION DESIGNS

We can offer a variety of perforation designs, the ones to best suit your building. We can offer :

- ROUND , HEX , SQUARE , SLOTTED and IRREGULAR DESIGNS type of holes
- PUNCHED , EMBOSSSED or LOUVERED holes.

Our engineers work closely to generate the best solution for your building, keeping in mind the ease of assembly on site and hassle free maintenance.

PROJECT : VAISHNAVI , BANGALORE NOV 2009

## Features.

- 3000 sq.mt of aluminium perforated panels
- 12 storeys of metallic perforated facade
- Manufactured at DMSPL and transported in SKD condition to site

### Design excellence.

The facade system has been designed carefully to withstand wind loads and environmental forces. The sturdy frame system plays an important role.

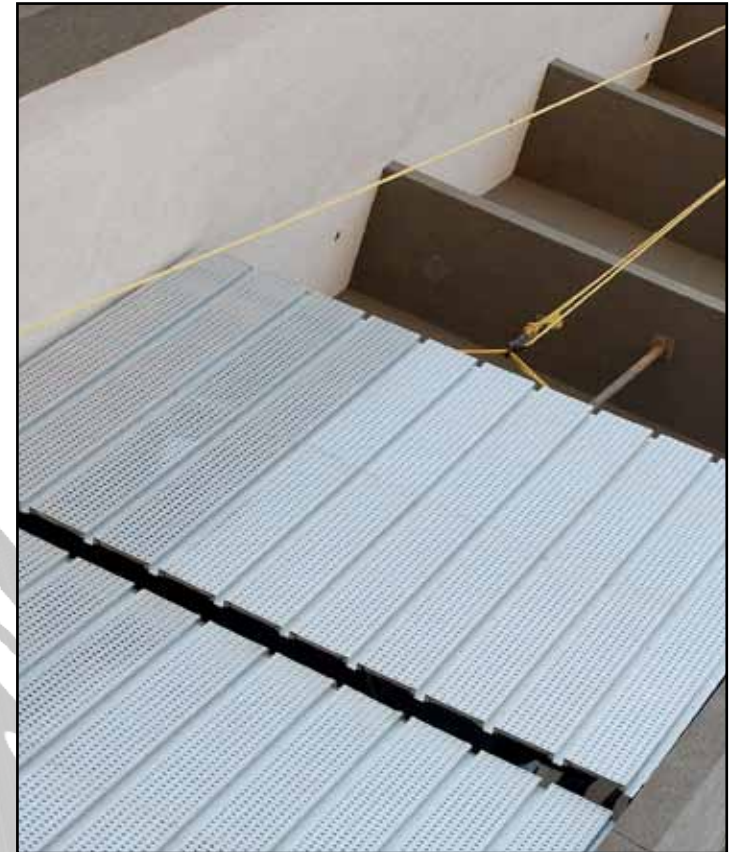

The frames are manufactured using Galvanised steel, to prevent the material from rusting.

### Ease of assembly

The facade frame system has been manufactured and designed in a fashion that allows ease of transport and assembly on site.

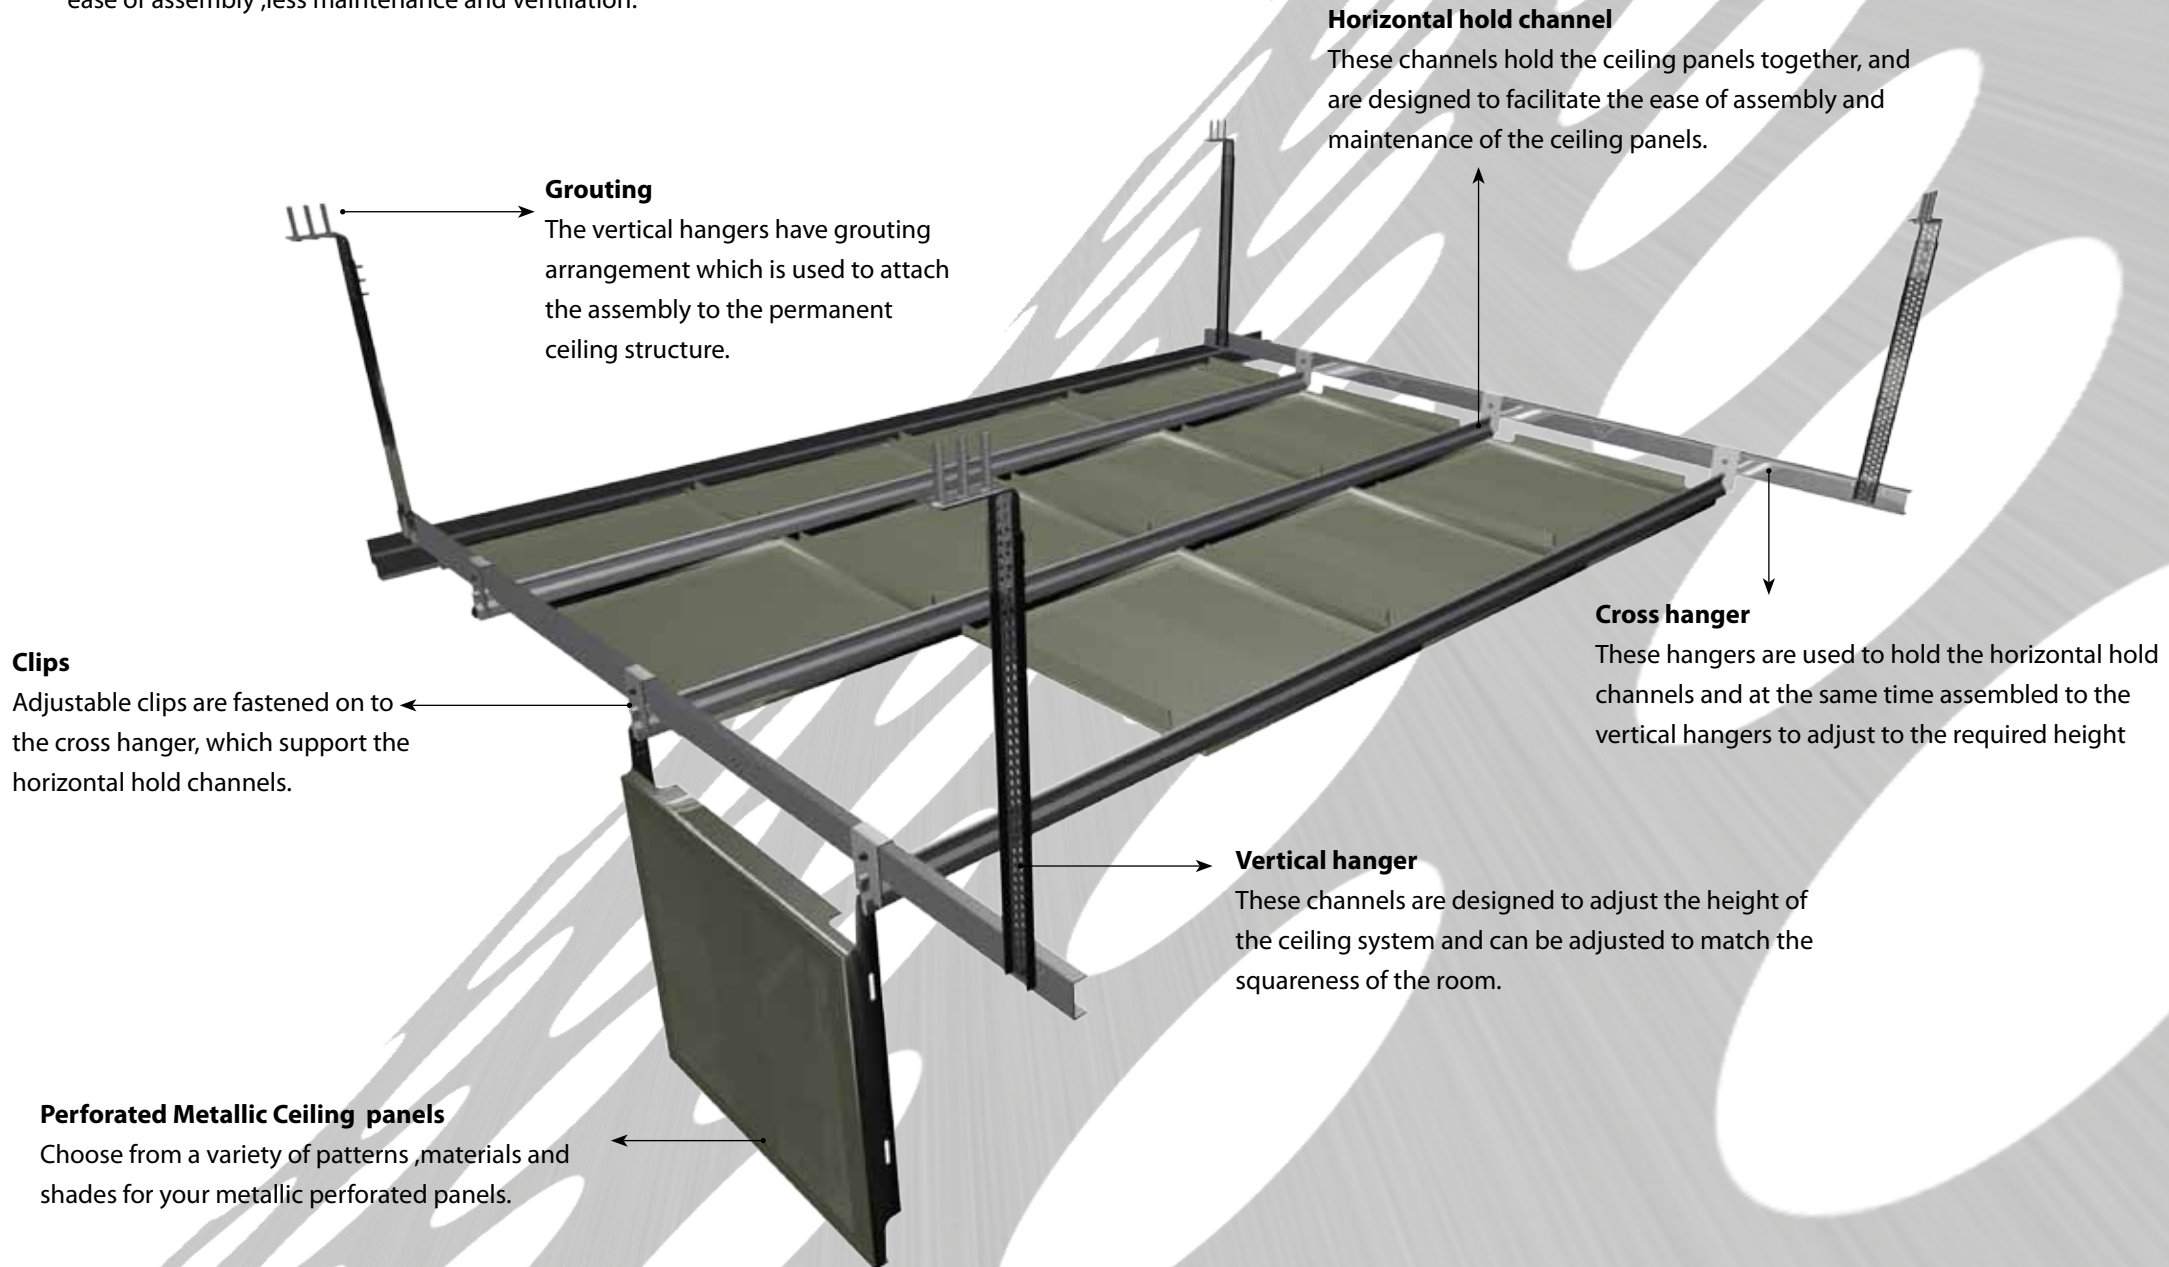

The frames are assembled and fitted on to the building walls to form the whole facade.

## Perforated Ceiling systems

Perforated false ceiling systems are a good option for modern offices and malls, as they have several advantages like elegance, ease of assembly, less maintenance and ventilation.

## OTHER PRODUCTS

### Roofing Solutions

Using corrugated sheets with louvres and perforations can be the ideal ventilation roofing solution.

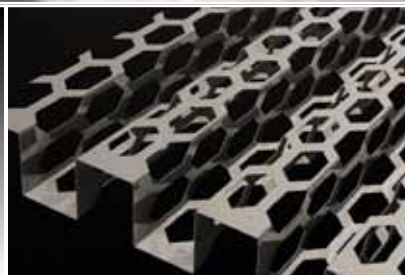

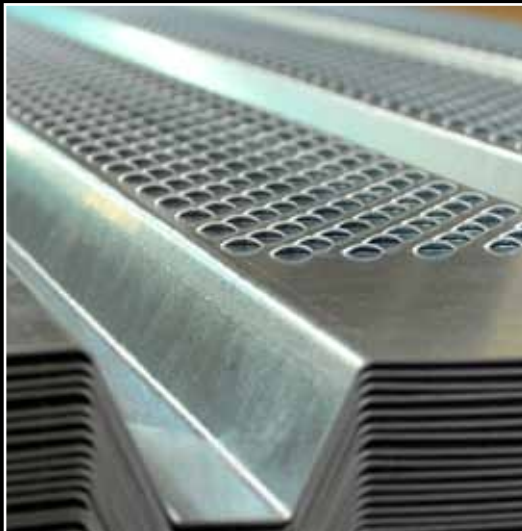

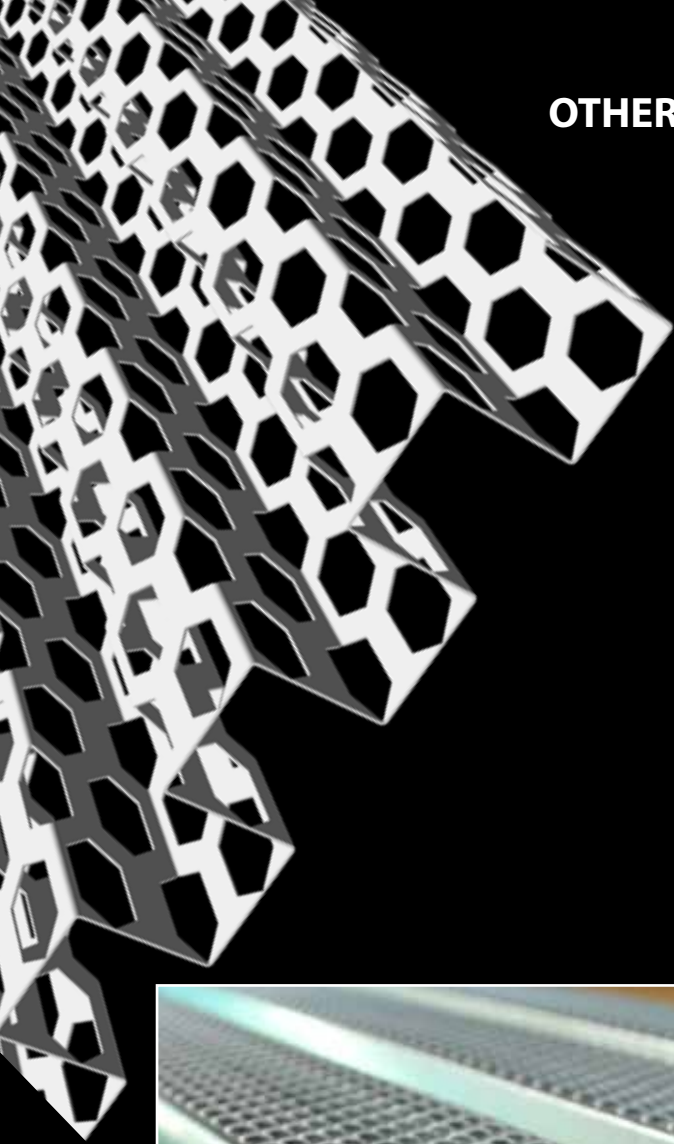

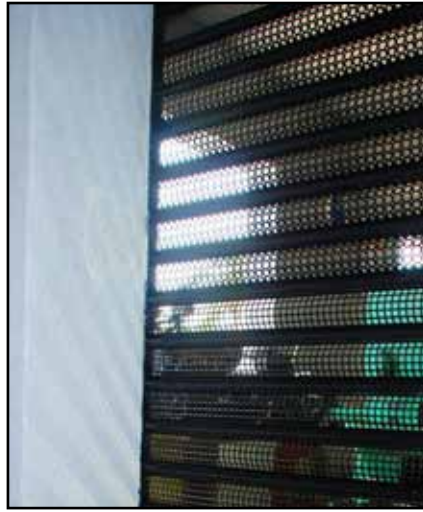

### Perforated Railing Systems

Railing systems with perforated steel infill panels and handrails are the perfect solution for modern office complexes and malls. They are maintenance free and are easily replaceable. Available in SS and MS.

### Fully customised solutions.

We at DMSPL manufacture your perforated product as per your design. With a fully customizable tooling facility, no pattern is too intricate.

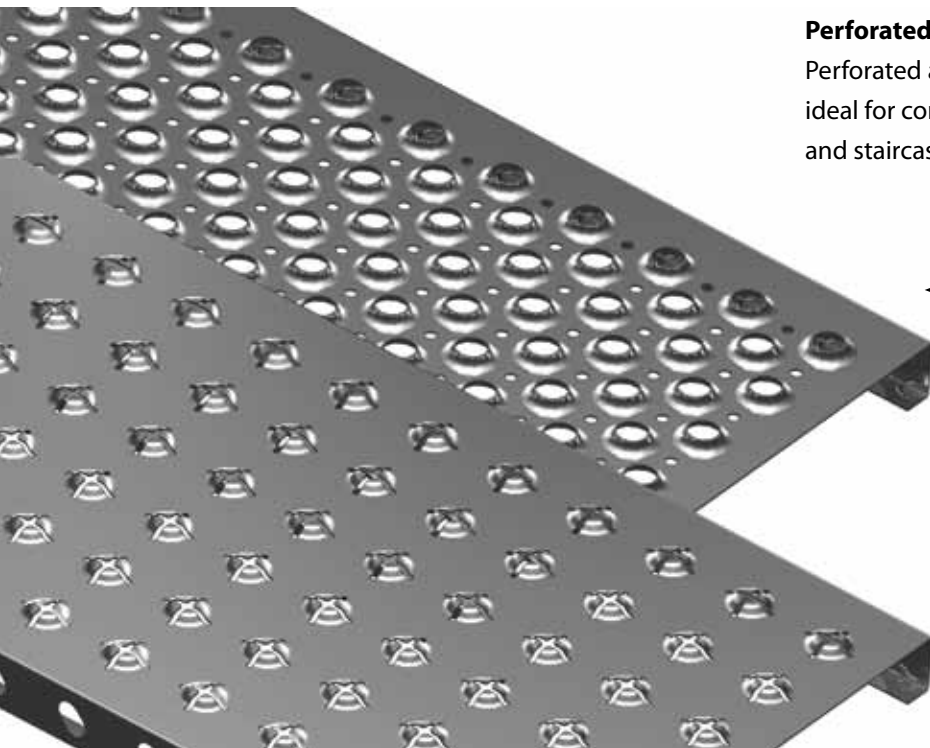

**Perforated Rolling Shutters**

DMSPL manufactures perforated rolling shutter systems, which offer the dual advantage of security and showcasing, while not compromising on the safety of the interiors.

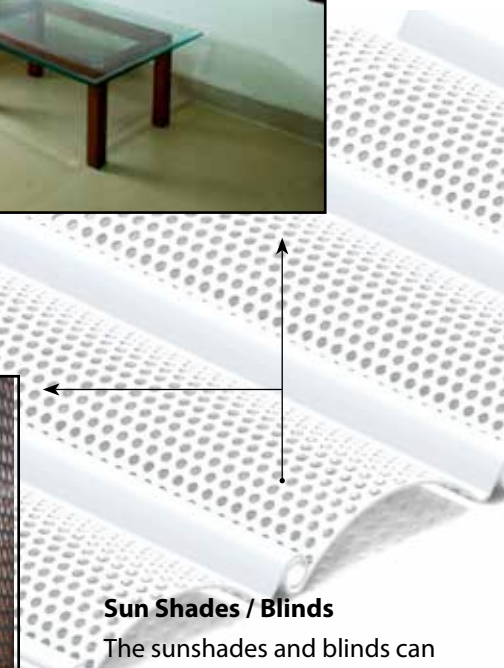

**Perforated Floor tiles**

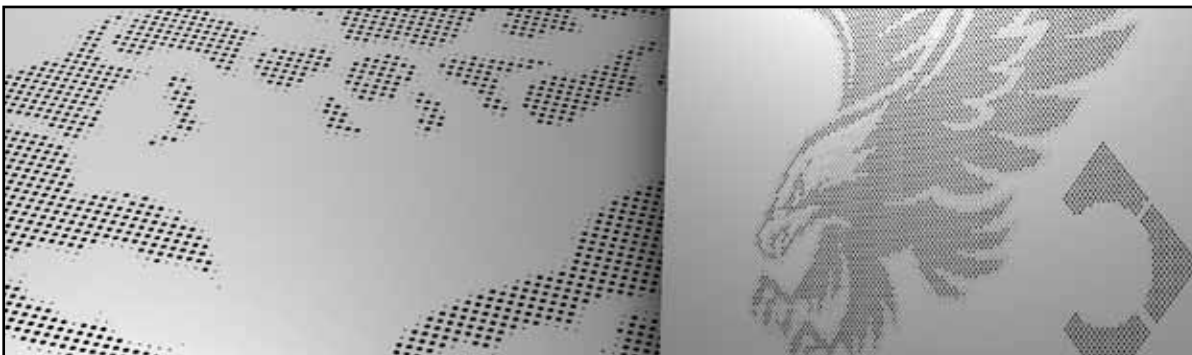

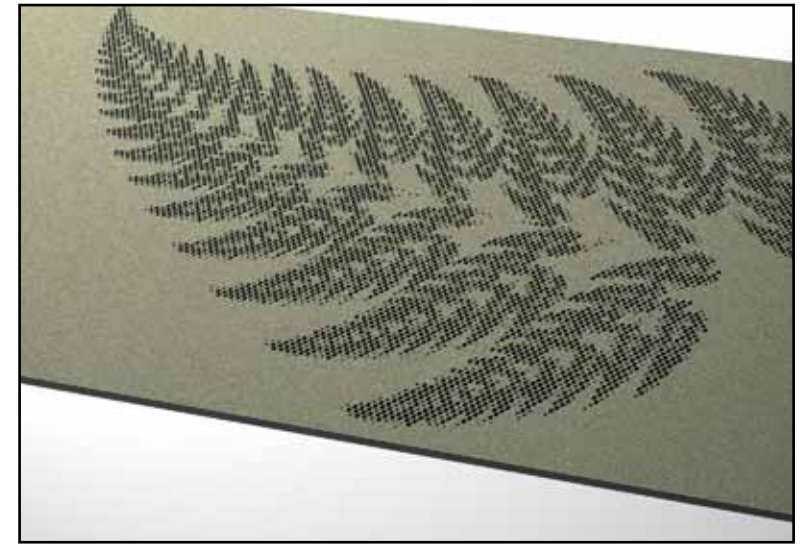

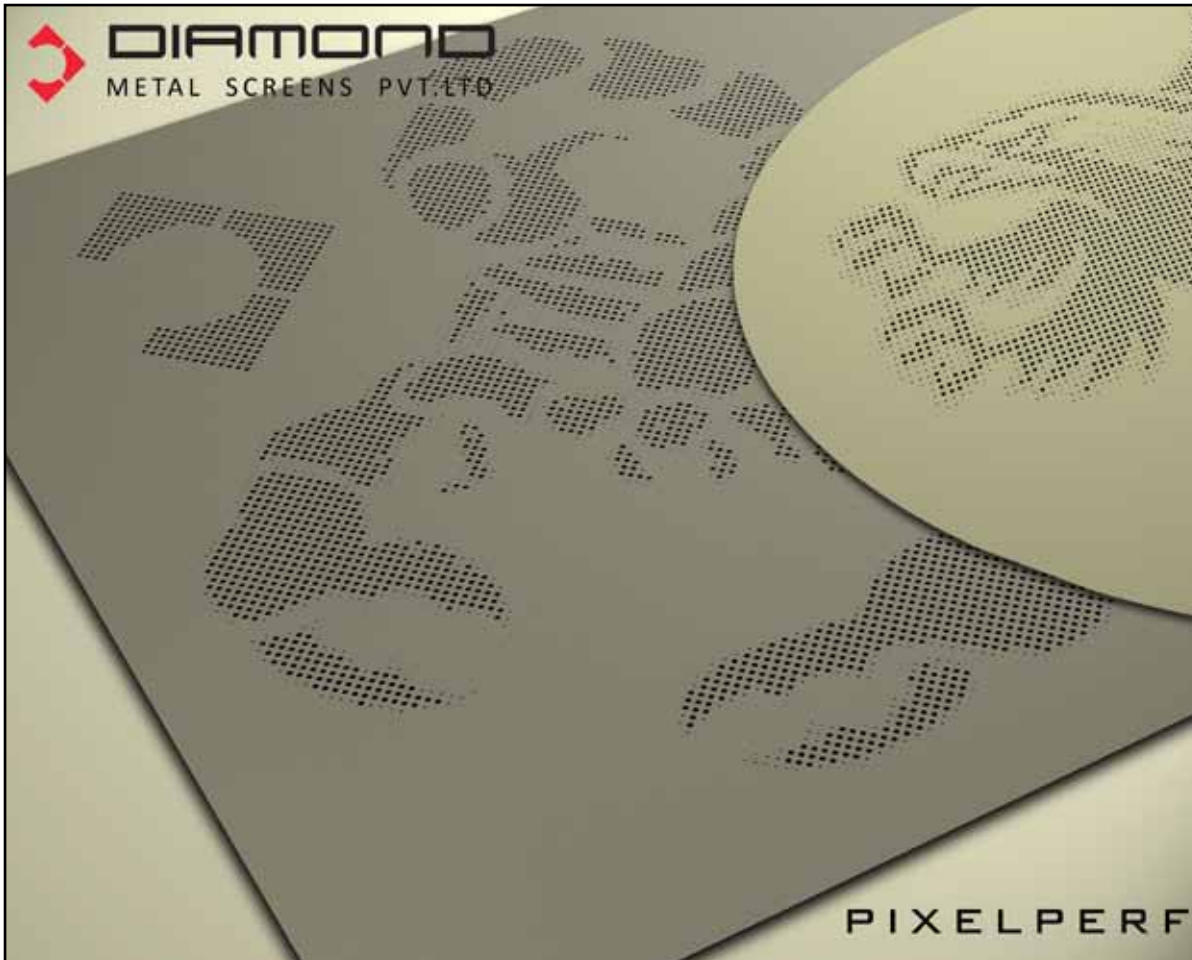

Perforated and formed anti skid floor tiles are ideal for construction sites, high rise buildings and staircases.

**Sun Shades / Blinds**

The sunshades and blinds can be used in both interiors and exteriors.

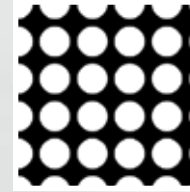

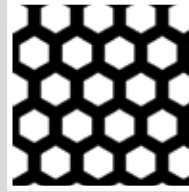

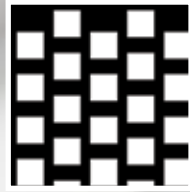

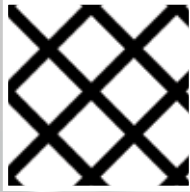

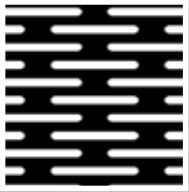

**PIXELPERF.**

Introducing **PIXELPERF**. The image punching technique at DMSPL. A truly unique feature to facilitate the perforation of an image.

# PERFORATION PATTERNS AND DESIGNS

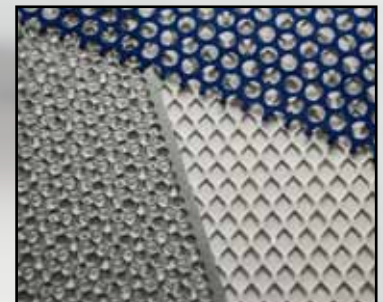

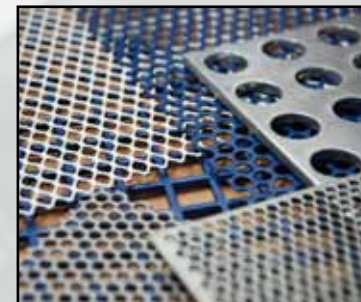

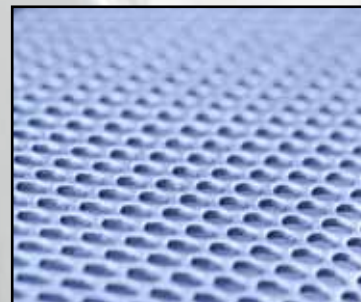

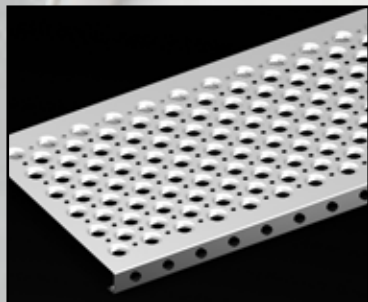

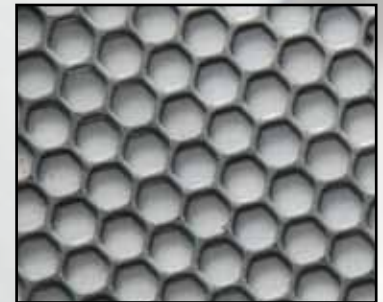

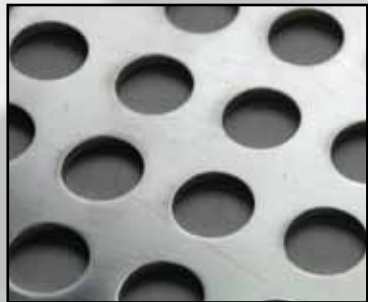

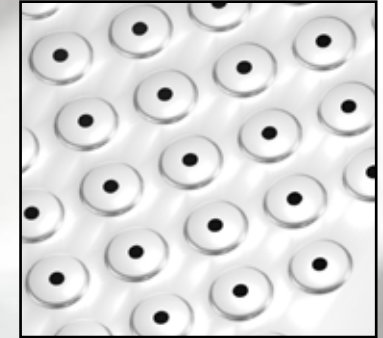

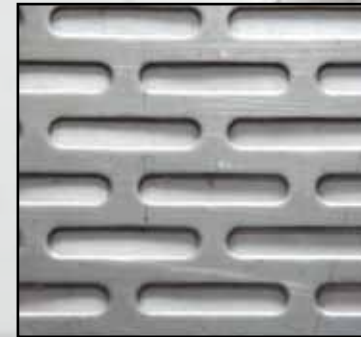

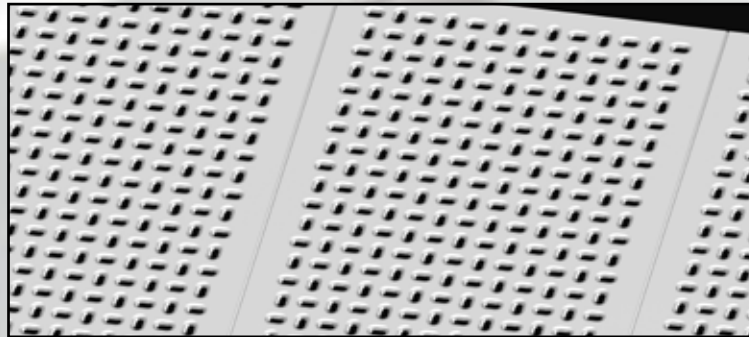

DMSPL is capable of manufacturing perforated sheet metal products backed by experienced tool room engineers to design and develop the most intricate of perforation patterns for you.

So go ahead, try us. Let your imagination run wild in designing and choosing the best pattern for your architecture design.

Choose from a wide variety of perforation patterns and designs :

- ROUND
- HEXAGONAL
- SLOTTED
- RECTANGULAR
- SQUARE
- DECORATIVE
