

DIAMOND

METAL SCREENS PVT.LTD

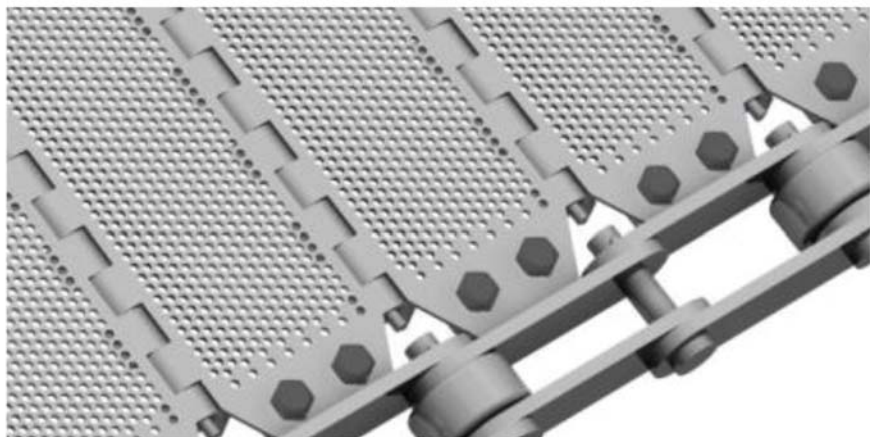

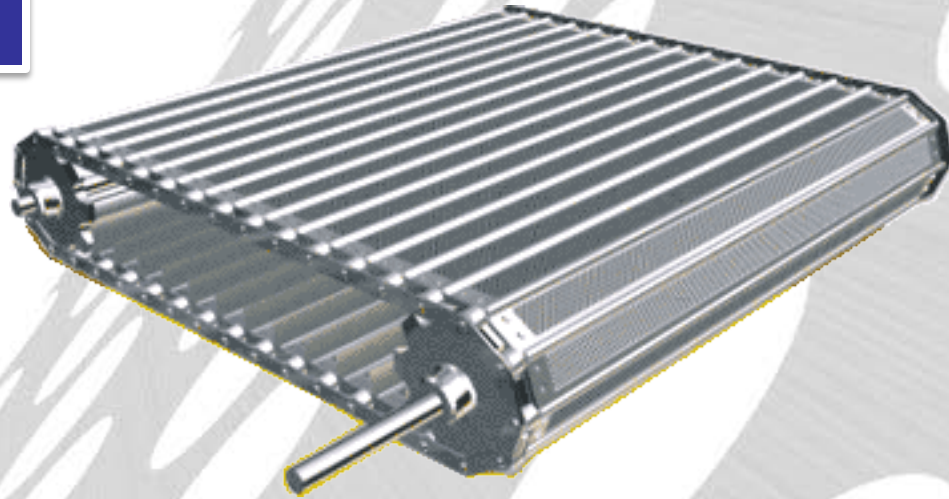

Welcome to the realms of sheet metal perforation.

- Established in 1987
- One of Asia's largest perforators
- Infrastructure spread over an area of 53,000 sq.ft in Belgaum, Karnataka.
- 175 employees
- Export oriented business.

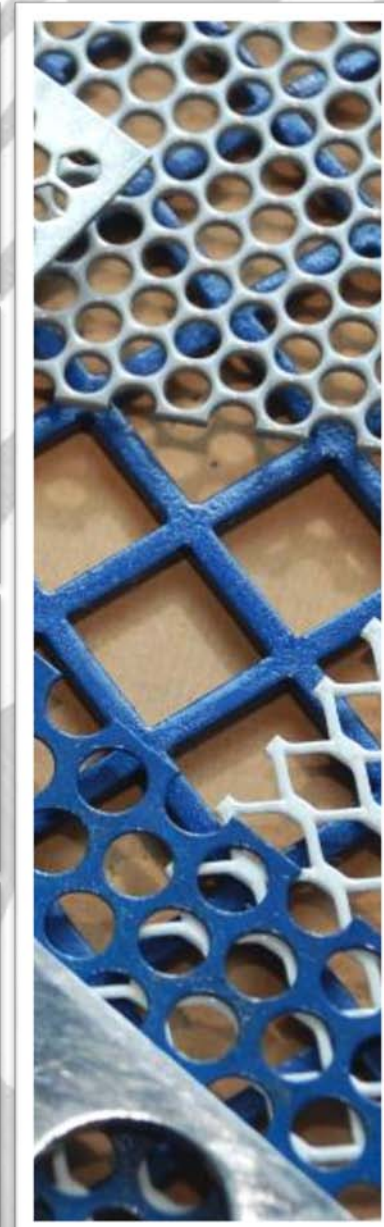

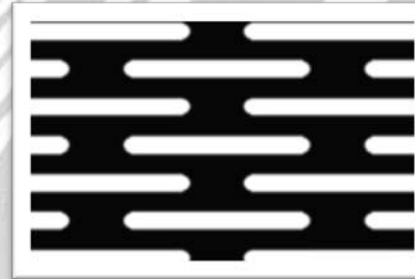

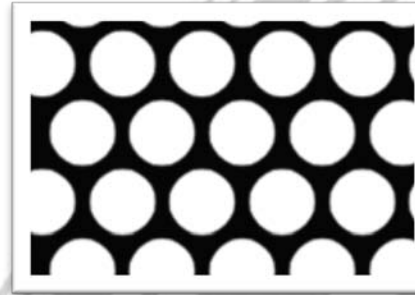

APRON CONVEYOR BELT SYSTEMS

- Apron conveyor belt systems are made in Stainless steel or Mild steel, as per requirement.
- The conveyor belt is constructed using perforated sheet aprons interlocked using piano hinge type arrangement.
- Product widely used in the food industry, especially coconut and tobacco industries.

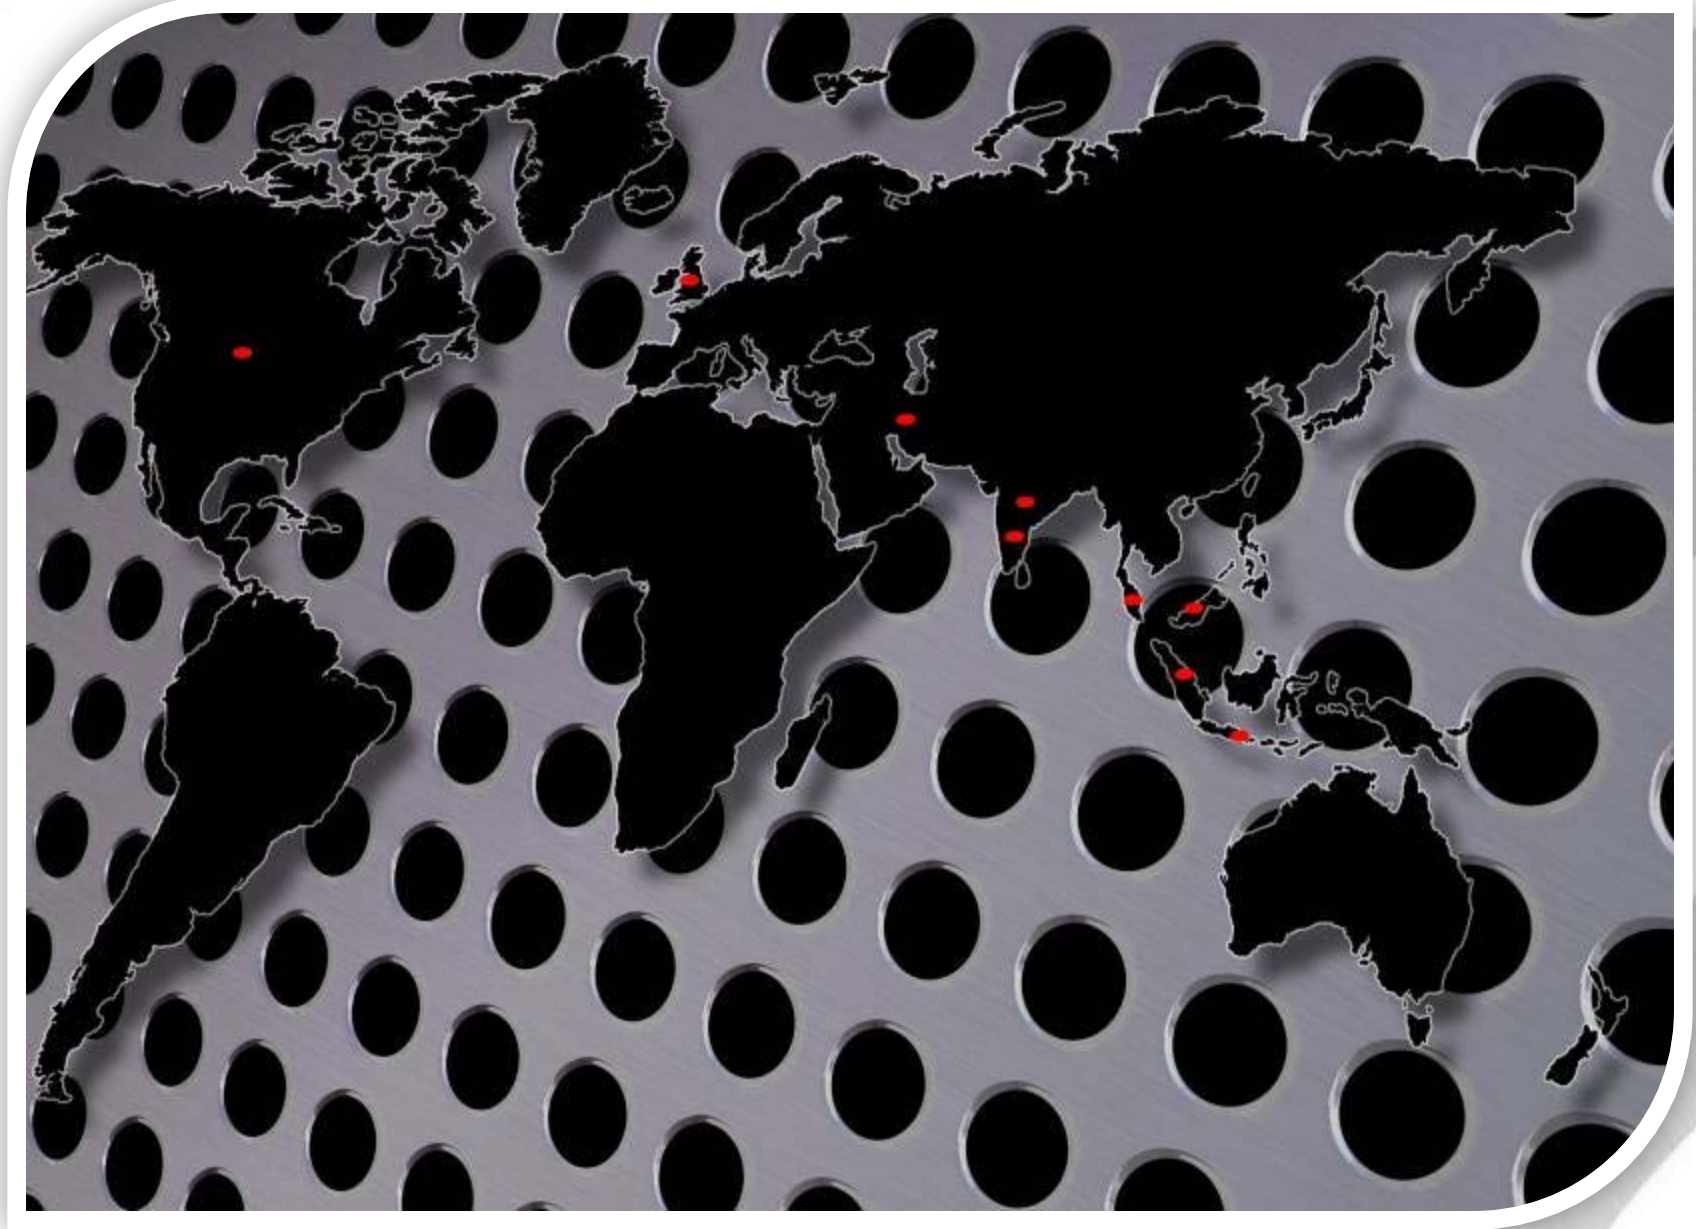

PERFORATED SHEETS

- DMSPL specializes in sheet metal perforation, with the capability to perforate almost any kind of pattern.
- Our in-house tooling facility allows us to design and produce specialized tools for each unique job.
- Emboss type, decorative type, louvered type are the examples of specialized perforations apart from the regular square, round, slotted type perforations.
- Perforation can be done on Mild Steel, Aluminum, Stainless Steel, Galvanized Sheets etc.
- Perforation can be done on Coil to Coil, Coil to Sheet and Sheet to Sheet form, as per customer requirement.

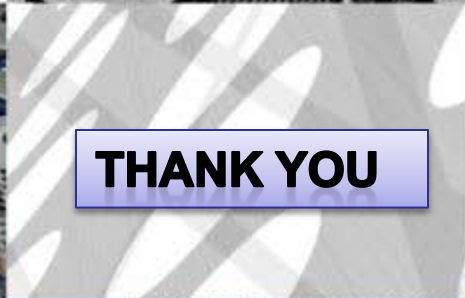

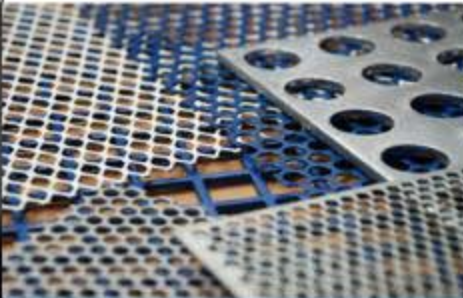

- Our Tool room facilitates us with the state of the art equipment designed to churn out quality tools for our machines.
- Tool room infrastructure includes :
 - Wire cut machines
 - CNC - Grinding machines
 - CNC - Vertical Milling Machines
 - EDM Machine.
- Tool bank of over 200 different patterns
